

**URGENT RELAYHEALTH NOTIFYRx™ DRUG RECALL NOTICE:**  
**APOTEX – CLASS II RECALL – 09/09/09**

**DUE TO THE NUMBER OF RECALLS ADDRESSED IN THIS ALERT, INFORMATION IS OUTLINED IN THE ATTACHED DOCUMENT.**

Apotex Pharmaceuticals is initiating a voluntary CLASS II recall that addresses a non-safety issue with the product due to fact that affected batches may not meet GMP specs, and as a precautionary measure, is asking all retail pharmacies to now remove the below listed **LOT #'s** for the **143 products** on the attached list. Included are controlled substances (Recalls 35-40 and 123-127 outlined in red).

Pharmacies are advised to quarantine and discontinue distribution of these lots. Further instructions will come directly from your distributor.

RelayHealth has responded by implementing a NotifyRx™ safety alert informing pharmacies of this recall at point-of-dispense when the claim is processed through the Intelligent Network.

Beginning today, all pharmacies that participate in the NotifyRx messaging program will see messages as detailed on the following attachment for the listed drugs.

If you have any questions about NotifyRx or are interested in signing up for the program, please contact your RelayHealth Sales Executive.
